No minimum amount of funds must be raised under this offering. This means that the Bank could complete this offering after raising only a small proportion of the offering amount set out above.

This Pricing Supplement supplements the short form base shelf prospectus dated July 3, 2018 relating to \$4,500,000,000 Medium Term Notes of the Bank, as amended or supplemented, and the Prospectus Supplement dated June 3, 2019. If the information in this Pricing Supplement differs from the information contained in the Prospectus and/or the Prospectus Supplement, you should rely on the information in this Pricing Supplement. Holders should carefully read this Pricing Supplement, the Prospectus Supplement and the accompanying Prospectus to fully understand the information relating to the terms of the Note Securities and other considerations that are important to Holders. All three documents contain information Holders should consider when making their investment decision. The information contained in this Pricing Supplement and the accompanying Prospectus and Prospectus Supplement is current only as of the date of each.

The estimated initial value of the Note Securities as of the date of this Pricing Supplement is \$94.35 per \$100 of Principal Amount, which is less than the issue price. The estimated initial value is equal to 94.35% of the Principal Amount, being equivalent to a \$2.83 annual discount over the term of the Note Securities. The actual value of the Note Securities at any time will reflect many factors, cannot be predicted with accuracy, and may be less than this amount. We describe our determination of the estimated initial value in more detail in the Prospectus. The Independent Dealer did not participate in the preparation of the estimated initial value for the Note Securities. See "Description of the Note Securities – Estimated Initial Value of Linked Note Securities" in the Prospectus.

The Note Securities differ from conventional debt and fixed income investments; repayment of the entire Principal Amount is not guaranteed. The Note Securities entail downside risk and are not designed to be alternatives to conventional debt or fixed income investments or money market instruments.

The Note Securities constitute direct, unsecured and unsubordinated debt obligations of the Bank ranking *pari passu* with all other present and future unsecured and unsubordinated indebtedness of the Bank. **The Note Securities will not constitute deposits that are insured under the *Canada Deposit Insurance Corporation Act* or any other deposit insurance regime designed to ensure the payment of all or a portion of a deposit upon insolvency of the deposit taking institution.**

Amounts paid to Holders will depend on the performance of the Reference Portfolio. None of the Bank, its affiliates, the Dealers, or any other person or entity guarantees that Holders will receive an amount equal to their original investment in the Note Securities or guarantees that any return will be paid on the Note Securities at maturity. Since the Note Securities are not protected and the Principal Amount will be at risk (other than the amount of the Buffer or the minimum Maturity Redemption Payment of 1% of the Principal Amount in the event that the Buffer is less than 1%), it is possible that Holders could lose some or substantially all of their original investment in the Note Securities. See “Risk Factors” in the Prospectus Supplement and the Prospectus.

The Note Securities are not redeemable prior to maturity, except by the Bank pursuant to a Reimbursement Under Special Circumstances. See “Description of the Note Securities – Reimbursement Under Special Circumstances and Payment” in the Prospectus. The Note Securities will not be listed on any securities exchange or quotation system. National Bank Financial Inc. intends to maintain, under normal market conditions, a daily secondary market for the Note Securities. National Bank Financial Inc. may stop maintaining a market for the Note Securities at any time without any prior notice to Holders. There can be no assurance that a secondary market will develop or, if one develops, that it will be liquid. Moreover, Holders selling their Note Securities prior to maturity may be subject to certain fees. See “Secondary Market for the Note Securities” in the Prospectus Supplement.

The Reference Asset Return for the Reference Asset is a price return, and will not take into account dividends and/or distributions paid by the issuer on account of the Reference Asset. As of March 17, 2020, the dividends and/or distributions paid on account of the Reference Asset in the Reference Portfolio represented an annual indicative yield of 4.14%, representing an aggregate yield of approximately 8.28% over the term of the Note Securities, assuming that the yield remains constant and the dividends and/or distributions are not reinvested.

National Bank Financial Inc. is an indirect wholly-owned subsidiary of the Bank. **As a result, the Bank is a “related issuer” and a “connected issuer” of National Bank Financial Inc. within the meaning of the securities legislation of certain provinces of Canada.** See “Plan of Distribution” in the Prospectus Supplement and in the Prospectus.

While the Reference Fund is a mutual fund under the securities legislation of certain provinces and territories of Canada, it has been granted exemptive relief from certain provisions of Canadian securities legislation applicable to conventional mutual funds. BlackRock Asset Management Canada Limited (“BlackRock Canada”) is the trustee, manager and portfolio adviser of the Reference Fund and is responsible for the day-to-day administration of the Reference Fund.

The Reference Fund seeks to provide long-term capital growth by replicating, to the extent possible, the performance of the S&P/TSX 60 Index, net of expenses. The investment strategy of the Reference Fund is to invest primarily in and hold the securities of the S&P/TSX 60 Index in substantially the same proportion as they are reflected in the S&P/TSX 60 Index. The Reference Fund may invest in and hold units of other exchange-traded funds of which BlackRock Canada or an affiliate is the manager, and/or other equity securities, provided that such holding by the Reference Fund is consistent with its stated investment objective. Volatility is the term used to describe the magnitude and frequency of the changes in a security's value over a given time period. A higher volatility means that a security's value can potentially be spread out over a larger range of values. This means that the price of the security can change dramatically over a short time period in either direction. A lower volatility means that a security's value does not fluctuate dramatically, but changes in value at a steady pace over a period of time.

INVESTMENT STRATEGY SUPPORTING A PURCHASE OF THE NOTE SECURITIES

NBC Sprint™ (Capped Accelerator) Note Securities (Buffered)

You should consider a purchase of the Note Securities rather than alternative investments (including a direct purchase of the Reference Asset or exposure to it) if you expect that:

- (i) the Reference Portfolio Return will be positive on the Valuation Date; and
- (ii) as of the Valuation Date, the Reference Portfolio Return will not be higher than the Maximum Note Securities Return; and
- (iii) in a negative Reference Portfolio Return scenario as of the Valuation Date, the Reference Portfolio Return will be equal to or higher than the Barrier.

If your expectations of the Reference Portfolio Return differ from these, you should consider alternative investments rather than an investment in the Note Securities.

SUITABILITY OF THE NOTE SECURITIES FOR INVESTORS

NBC Sprint™ (Capped Accelerator) Note Securities (Buffered)

The Note Securities are not suitable for all investors. In determining whether the Note Securities are a suitable investment for you please consider that:

- (i) the Note Securities provide limited protection for your original principal investment and if the Reference Portfolio Return is negative and lower than the Barrier on the Valuation Date, you will receive an amount which is less than your original principal investment at maturity even considering the Buffer;
- (ii) any positive Reference Portfolio Return beyond the Maximum Reference Portfolio Return will not yield any additional return for the Note Securities;
- (iii) your investment is subject to the Maximum Maturity Redemption Payment;
- (iv) your investment strategy should be consistent with the investment features of the Note Securities;
- (v) your investment time horizon should correspond with the term of the Note Securities; and
- (vi) your investment will be subject to the risk factors summarized in the section “Risk Factors” in the Prospectus Supplement and the Prospectus.
